

Fourth Annual Ri.MED Scientific Symposium

New Drugs, New Vaccines and New Insights into the Cause and Prevention of Human Diseases

Program

AM	9.00	<i>Registration</i>
AM	9.15	Paolo Pucci di Benisichi, Bruno Gridelli: Welcome and Introduction
AM	9.30	Rino Rappuoli: Vaccines to address the needs of a 21st century society
AM	10.15	Chiara Cosentino and Neil Hukriede: Kidney damage, regeneration and small molecules: studying a zebrafish model of acute kidney injury
AM	11.00	<i>Break</i>
AM	11.30	Paola Corti and Beth Roman: Arteriovenous malformations: insights from zebrafish
PM	12.15	Filippo Pullara: Biochemical assembly of membrane signaling pathways Guillermo Calero: Protein nano-tools: novel molecular modulators of the immune response
PM	1.00	<i>Lunch</i>
PM	2.00	David Vorp: Biomechanical evaluation of abdominal aortic aneurysm: toward clinical utilization Salvatore Pasta: Biomechanical evaluation of ascending thoracic aortic aneurysm
PM	2.45	Mark Gladwin: Hemolysis associated pulmonary hypertension and end organ failure: a major cause of death in sickle cell disease and thalassemia
PM	3.30	<i>Break</i>
PM	3.45	Mark Gjomarkaj: Lung injury in Chronic Obstructive Pulmonary Disease (COPD) Bruce Freeman: A new drug class emerges from the fires of inflammation Chiara Cipollina: Enzymatic generation of novel anti-inflammatory mediators from omega-3 fatty acids
PM	4.45	Pierangelo Cifelli: New strategies for the repair of neuronal damage Michele Simonato: Pathophysiology of epileptogenesis and epileptogenesis associated cell damage Anthony Grace: Pathophysiology of schizophrenia and schizophrenia associated cell damage
PM	5.45	Arthur Levine: Closure of the meeting

Monday, 25

October 2010

*Villa Igiea
Salita Belmonte 43
Palermo, Italy*
