

Welcome to a scientific seminar on “confounding by indication”

Time: Monday November 8th , 13.30-17.00

Venue: Lecture hall Andreas Vesalius, Karolinska Institutet, Stockholm

The symposium will cover various aspects of confounding by indication in pharmacoepidemiologic studies and a discussion on a recent Swedish comparative effectiveness study. Participation is recommended for all who are interested in pharmacoepidemiology and its potentials in assessing the effectiveness of drug therapy.

For more information and registration – check the website of SLEFs - www.pharmacoepi.se

13.30-13.45	Introduction	Björn Wettermark, Niklas Hammar & Helle Kieler
13.45-14.15	Confounding by indication: what is it and how can we deal with it?	Helle Kieler
14.15-14.45	Case Crossover Design in pharmacoepidemiology	Johan Hallqvist & Jette Möller
14.45- 15.30	Poster walk and coffee	
15.30-16.00	Exposure Propensity Scores	Fredrik Granath
16.00-16.30	Anti-hypertensive treatment and cardiovascular risk – a Swedish comparative effectiveness study	Johan Bodegård
16.30-17.00	Discussion Panel of speakers	

Organized by the Swedish Society for Pharmacoepidemiology and the Centre for Pharmacoepidemiology (CPE) at Karolinska Institutet
